

COMPANY PROFILE

**Purpose-built and
engineered solutions,
since 2008.**

Engineered products and
systems for water
consumption, movement,
distribution, thermal
transfer, and drainage
across residential,
commercial, industrial
and infrastructure
applications.

MENA Edition

**From Water In to Water Out.
Engineered as One.**

ENGINEERED WATER SYSTEMS

“Eau” means water. “Technik” means technology. Together, they define who we are.

Eautechnik GmbH is a German-headquartered, family-run water-technology company developing engineered products and systems for the MENA region.

Our story began in 1988, when our founder, Mohammad Ibraheem Khan, moved to the Gulf and gained first-hand experience of the region’s operating and maintenance challenges. In 2001, he founded Allied Arab Trading in Dubai, initially representing leading international brands.

Recognising that global products were not always suited to regional conditions, we created our own specialist brands and began developing purpose-built products and solutions with experienced manufacturing and technology partners worldwide.

Our regional supply track record began in 2008, and Eautechnik GmbH was incorporated in Frankfurt in 2014. Today, Allied Arab Trading serves as our regional distributor and service provider.

Our mission is to deliver reliable, efficient and maintainable solutions engineered for regional conditions and long-term value.

INSTALLED PUMPING SYSTEMS

PUMPING SYSTEMS, HYDRONICS & PACKAGED SOLUTIONS

PUMPING SYSTEMS

Vertical in-line, end-suction and split-case pumps for transfer, circulation and water supply.

SEWAGE, WASTEWATER & DRAINAGE

Submersible sewage, drainage, sump and dewatering pumps.

HYDRONIC SYSTEMS & SPECIALISED PUMP VALVES

Air and dirt separators, suction diffusers, triple-duty valves, strainers and balancing components.

PACKAGED PUMP SYSTEMS

Booster, transfer, pressurisation and skid-mounted systems with coordinated controls.

CONTROLS, INSTRUMENTATION & MEASUREMENT

VFDs, panels, sequencing, BTU and flow metering, sensors and transducers.

PRESSURISATION, DEGASSING & WATER QUALITY

Pressurisation Units, expansion & pressure tanks, vacuum degassing and filtration systems.

MUBADALA HEADQUARTERS (FORMERLY IPIC HEADQUARTERS)

Abu Dhabi, UAE

Dot-X sanitary and plumbing solutions supplied.

SANITARY, PLUMBING, WATER HEATING & DRAINAGE

SANITARY & BATHROOM

Ceramic and stainless steel sanitary ware, kitchen and basin mixers, faucets, showers, shattafs and concealed cisterns.

SANITARY FITTINGS

SANITARY WARE

CISTERNS & FLUSHING SYSTEMS

ELECTRIC WATER HEATING, INSTRUMENTATION & SAFETY

Electric water heaters, pressure instruments, test points, safety valves and water-heating accessories.

ELECTRIC WATER HEATING

INSTRUMENTATION & MEASUREMENT

SAFETY & PRESSURE CONTROL

VALVES & WATER CONTROL

PICVs, isolation and regulating valves, strainers, check valves and water-hammer protection.

PICV & FLOW-CONTROL VALVES

COMMERCIAL VALVES

PLUMBING VALVES

TECHNICAL DRAINAGE & ACCESS

Floor, roof, balcony and linear drains; cleanouts, gratings, access covers and manholes.

ROOF DRAINAGE

FLOOR DRAINAGE

LINEAR DRAINAGE & ACCESS

Dot-X listed by Estidama (2010) under the Pearl Rating System · pioneered the pressure-controlled water-saving shattaf — a Middle East first

WATER HEATING, COOLING & RENEWABLE SYSTEMS

Thermal-energy and water-reuse products and solutions for domestic, commercial and institutional buildings.

SOLAR THERMAL HEATING SYSTEMS

Collectors, thermosiphon and forced-circulation systems, and pressurised solar water heating.

SOLAR THERMAL HEATING

FORCED-CIRCULATION
SOLAR SYSTEMS

CENTRAL & ELECTRIC WATER HEATING SYSTEMS

Calorifiers, boilers, electric and indirect water heaters, storage tanks and central hot-water packages.

CENTRAL WATER HEATING

HEAT PUMPS

HEAT PUMPS

Domestic hot-water, air/water, ground-source and exhaust-air systems.

HEAT TRANSFER, COOLING & THERMAL STORAGE

Heat exchangers, water-cooling systems, buffer tanks and thermal storage.

THERMAL STORAGE

GREYWATER RECYCLING

GREYWATER RECYCLING SYSTEMS

Packaged systems for treating and reusing greywater in non-potable applications.

PIPING SYSTEMS

Pipes and fittings for water supply, pressure piping, drainage, heating and cooling.

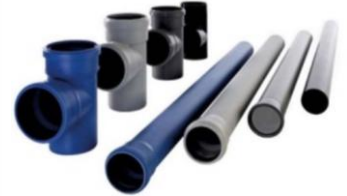

PP-R SYSTEMS

PEX / XLPE SYSTEMS

UPVC SYSTEMS

HDPE & ACOUSTIC
SYSTEMS

PP-R • PEX / XLPE • UPVC • HDPE • LOW-NOISE / ACOUSTIC • COPPER

PIPE SUPPORTS AND FIXING SYSTEMS

Engineered pipe supports, hangers and fixings for secure, aligned and maintainable mechanical services.

BEAM CLAMPS

CLAMPS • HANGERS • THREADED RODS • FASTENERS • BEAM CLAMPS • SUPPORT CHANNELS

WHY EAUTECHNIK?

Our products and solutions are purpose-built around MENA environmental conditions, water scarcity, water and energy efficiency, and the way systems are operated and maintained across the region.

Engineered for MENA conditions with leading technology and manufacturing partners while providing local product lifecycle support.

ENVIRONMENTAL CONDITIONS

Product specifications and materials are designed for regional conditions—heat, dust, humidity and corrosive coastal exposure.

WATER SCARCITY

Water-saving products and efficient system design help reduce avoidable water use.

WATER QUALITY

Wetted components are selected for regional water-quality variation and the project duty.

ENERGY PERFORMANCE

Efficient motors, variable-speed control and system selection reduce energy use without compromising duty.

OPERATING PRACTICES

Product design, controls and configurations are aligned with local preventive-maintenance practices and operating methods.

MAINTENANCE & LIFECYCLE

Accessible components, local support and spares simplify maintenance and protect long-term value.

SUPPORT ACROSS THE PROJECT LIFECYCLE

FROM SELECTION TO DECOMMISSIONING

We support our solutions for their whole life—from the design & selection to final decommissioning. Support is delivered through authorised local teams, with project-ready documentation and continuity after handover.

PROJECT DELIVERY

Design & selection · BIM/submittals & documentation · supply & logistics · installation support · start-up & commissioning

IN OPERATION

Training & handover · condition monitoring · service & maintenance · spare parts & replacements

END OF LIFE

Retrofits, including energy-efficiency retrofits · upgrades & decommissioning

CERTIFICATIONS & APPROVALS

Independent standards. Project-ready documentation.
